March-FX 4.5-28x52 High Master Wide Angle Rifle Scope

This scope was developed with practical precision shooting competitors in mind, but ease of use and moderate weight make it equally at home on nearly any shooting platform.

First Focal Plane Scope with 6.2 Magnification Ratio incorporates High Master optical system combined with athermal construction.

This 4.5-28x52 scope guarantees superb image quality and focus stability across a broad range of temperatures.

25 Degree Wide Angle (Large Eye Box) Eyepiece will enhance FOV throughout the 6.2 magnification range.

Fast pitch eyepiece setting comes in handy when the time is the essence.

Multi-turn 10 mil elevation turret, 36 mrad of total travel adjustment and with close-focus distance starting from 10 yards, the new 4.5-28x52 works well on anything from accurate air rifles to long precision centerfires.

Magnification Low: 4.5x

High: 28x

Effective lens diameter(mm): 52mm

Windage/Elevation turret : 1 click 0.1mrad, 10mrad per 1 turn

Total travel amount : Elevation: 36mrad, Windage: 20mrad

Elevation turret : 0-set function

Side Focus : 10Yds to infinity

Illumination : Yes

Eyepiece : 25 degree wide angle eyepiece

Main tube : 34mm

Overall length : 320mm (12.6inch)

Weight : 845g (29.8oz)

Reticle: FML-MT, FML-3
