Weight : 624g/22.0oz
Reticle : FD-1, FD-2
(Daybright fiber dot
illuminated reticle)

March Compact 1.5x-15x42

New light weight and compact 1.5-15x42 riflescope is ideal for hunting and for precision semi-auto platforms. 42mm objective lens produces excellent low light performance in a compact form factor, while 1.5x low end magnification together with a day bright illuminated dot makes for very fast target acquisition. Day bright fiber dot illumination FD-1 and FD-2 reticles are the perfect choice for hunting and tactical shooting. The diopter adjustment mechanism has been improved so you can adjust the eyepiece to your eye faster than ever before.
