## PSR™ DOVETAIL PRODUCT MANUAL

### PARTS LIST

1	RING BASE	× 2
2	CAP	× 2
3	CLAMP	× 2
4	M6×30 SCREW	× 2
5	M4×10 SCREW	× 8

### REQUIRED TOOLS

TORQUE WRENCH / H5 & T15 BIT

H5 & T15 SCREWDRIVER

### RELATED PRODUCTS

SCOPELINK™ ACCESSORY CAP

SL0005/A  
SCOPELINK™ RAIL H1 - 15MM

### MAJOR FEATURES

- Scope rings compatible with 11mm and Kelbly dovetail rails
- CNC machined from single 7075-T651 aluminium billets
- Hardcoat anodizing / MIL-A-8625 Type III

### INSTALLATION INSTRUCTIONS

1. Properly place the ring bases on the rail according to its type (FIG.A).
2. While keeping the bases in position, attach the clamps with M6×30 H5 screws applying a slight torque.
3. Tighten the clamping screws to the following torque value range: **3.5 - 4Nm [31 - 35.4 inch-pound] (never exceed).**
4. Place the scope into the rings then attach the caps and start M4×10 T15 screws into the bases as shown (FIG.B).
5. Check for a comfortable eye relief and level the scope.
6. Make sure the gaps on either side of the clamp are kept even (FIG.C) then tighten the caps to the final torque value suggested by the scope manufacturer, **never exceed 3Nm [26.5 inch-pound].**
