- Apparent field of view: 25.8 degrees
- With reticle, with/without accessory rail

## Tenebraex lens covers & custom-made adapter rings by DEON

This is a custom-made set specially designed for the 5-42 Gen II model, created in response to shooters' request. It is suitable for PRS and long-range shooting.

## Scope cover made in Japan

It features a water-repellent finish that protects the scope from rain, scratches, and dust. The scope cover is available in two versions: with detachable side flaps on both sides, or without flaps. The flapped version helps shield the firearm's action area from direct sunlight, reducing heat buildup and minimizing its impact on shooting performance.

## Strong and reliable perfectly fitted mounts by Area 419

Produced to the exact tolerances of March Scopes.
